

The PVP SPORTMAT range offers a wide variety of optimal floor surfaces with high load capacity and excellent sound and vibration absorption - the perfect solution for professional applications in fitness centres, sport arenas, gymnastic facilities, ice skating rinks or trade exhibition centres. The EF.- series is available in a comprehensive range of colours.

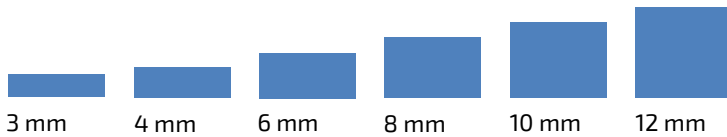

### Colour Content in %

10 %      20 %      40 %      70 %

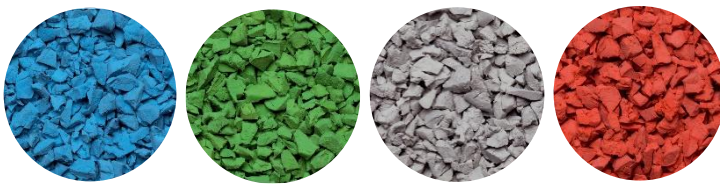

### Thickness:

Choose your thickness according to the shock absorption required.

### Standard colours:

Standard colours with a black background are blue, bright-green, grey, bright-red, bright-orange, bright yellow and white.

bright blue 64      bright green 87      grey 65      bright red 82

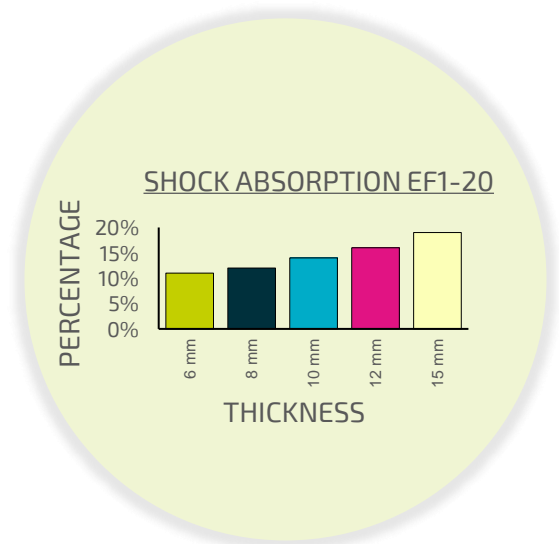

Bright orange 83      pink 52      bright yellow 89      white 60

PVP Sportmat EF-series is available in a variety of colours and/or colour combinations. The standard colour gradations in 10, 20, 40 and 70% allow for an individually designed floor with different visual effects depending on the percentage of colour used.

### Design your own floor:

Depending on the order volume, our customers can choose their own specific colour combinations as well as the color percentage to match any interior colour scheme they require. Please speak to our sales team for more information.

### SHORT FACT BOX

- Excellent shock absorption
- High impact resistance and resilience
- Uniform elasticity
- Slip resistant flooring for athlete protection
- Joint protection for the athlete

The EF-series should be in place where there is heavy mechanical or working load such as the weight area in fitness centres or where heavy foot traffic and noise reduction is required. The elasticity of the floor surface which protects the athlete from injury and the strong anti-slip properties are important criteria for the goal-orientated athlete.

## Standard Dimensions and Packaging:

Thickness (mm)	Dimensions (m)	Rolls/Palett	Weight/Roll (kg) approx.
3	1,25 x 10	20	40
4	1,25 x 10	15	55
5	1,25 x 10	12	70
6	1,25 x 10	11	80
8	1,25 x 8	11	80
10	1,25 x 6	11	80
12	1,25 x 6	6	100
15	1,25 x 6	6	120

## ADVANTAGES

- Easy installation
- Long-lasting
- Flexible applications
- Environmentally friendly
- Easy cleaning

## Our commitment to Quality:

We maintain the highest level of quality in our products and services by monitoring every step of the production process, delivery and customer service. We use our Quality Management System EN ISO 9001:2015 as a tool to guarantee reproducibility, maintain our continuous improvement policy and quality assurance, as well as to reinforce customer satisfaction.

## Our contribution to creating a healthy indoor environment:

Customers are making a conscious choice for eco-friendly products. Choose the **PVP SPORTMAT** range and be confident of using a certified product that adheres to the highest standards for indoor air quality (VOC emissions). **PVP** chose on the **Indoor Air Comfort GOLD LABEL** because it combines all European regulations as well as almost all relevant voluntary labels on VOC emissions into one single label. This gives customers the assurance that our products fulfil all stringent health safety criteria for low product emissions (VOC's) in indoor areas. The certification requires on-site audits and regular testing and certification ensuring that PVP products continuously pass the stringent requirements for a healthy indoor environment. The VOC requirements in Belgium, France, German AgBB, EMICODE, several EU ecolabel criteria, LEED and BREEAM are fully met.
